

## EBONY EYES

Every moment you're slippin' away  
From minutes to hours of every day  
Where have you gone what do you see  
Does anything ever remind you of me

I try to forget you  
It's hopeless it seems 'cause  
Since I first met you  
Don't know what that means

Moonlight tonight  
Take me on your magic flight  
Moonlight feels right  
Help me make it thru the night again

The seasons are slidin' from summer to fall  
I'm missin' our springtime the most of it all  
Keep searchin' this city for your ebony eyes  
I try to conceal these emotions disguised

I try to forget you  
It's hopeless it seems 'cause  
Since I first met you  
Don't know what that means

Moonlight tonight  
Take me on your magic flight

Moonlight feels right  
Help me make it thru the night again  
Help to make it feel alright again  
Help me with your mystic light to mend
