

## PLANETARY NIGHTS

We're just spinnin' in the starlight  
Sailing slowly through a dream  
Things are not quite what they seem

Sending signals pulse for insights  
To the borders of your mind  
Through the endless space and time

Move in smooth elliptic motion  
Ancient forms will shine and hum  
Speak to all but not for some

As we drift among the heavens  
Seekin' what we're meant to find  
Hidden visions in our mind

I need you near now and forever  
To help me figure out this flight  
Through these planetary nights

Shine your incandescent light  
Let me know that it's alright  
In these planetary nights
